

MergeOptics GmbH
Berlin, Germany
OFC – Booth # 3526

MergeOptics will demonstrate its SFP+ LR the latest member of the SFP+ product family at OFC 2007

Berlin Germany, -- March 21st, 2007

MergeOptics GmbH a leading supplier of low power modules for speeds of 10Gbit/s and higher is announcing the availability of its SFP+ LR modules.

The product will be demonstrated at MergeOptics booth #3526 together with the 2nd generation of MergeOptics SFP+ SR product, which accommodates the latest status of the SFP+ MSA including the multi rate capabilities supporting datarates reaching from 2Gbit/s to 10Gbit/s.

Both the SFP+ SR and the SFP+ LR will offer an extremely low power dissipation below 1W (typically).

Dag Neumeuer, President and CEO of MergeOptics stated today, "The SFP+ LR is another step to complete the industries most comprehensive 10Gbit/s product portfolio, the low power dissipation of MergeOptics product family addresses in particular the need of customer with a high port density.

About MergeOptics

MergeOptics GmbH was founded in Germany, in September 2000 and develops highly integrated components and modules for the rapidly growing optical communication market. The company integrates optical components (lasers, modulators and photo diodes) with high-frequency electrical circuits to create compact modules that operate with industry standard optical and electrical interfaces. MergeOptics' business objective is to specialize in high-speed optical products that are world-class for both integration and performance. MergeOptics has partnerships with several leading German universities and research facilities, including the prestigious Heinrich Hertz Institute in Berlin, Germany. For more information, please visit the company's website at www.mergeoptics.com or contact your regional Sales and Marketing partner.
